- 5) Notice of Informal Patent Application (PTO-152)
- 6) Other:

1) The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321© may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-7 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-51 of U.S. Patent No. 6,369,938 or claims 1-21 of U.S. Patent No. 6,400,499. The claims of Patent '938 disclose the invention defined by the herein pending claims except for the use of a transmitter and receiver. However, as the patent claims are directed to WDM optical signals in a controlled amplifier system it would have been *prima facie* obvious to one of ordinary skill in this art that a transmitter is used to create the signals and a receiver to receive them.

As regards the '499 patent, the claims of the '499 patent disclose the invention defined by the herein pending claims except for its specific recitation of a variable optical attenuator as opposed to the present more broadly claimed level controller. However it would have been *prima facie* obvious to one of ordinary skill in this art that a variable optical attenuator is a level controller as now claimed.

2) Applicant is required to update the status of all patent applications cited in their
